

3M Architectural Markets

The creative alternative to traditional glass decoration

3M films with special effects offer an additional creative possibility for decorating glass and transparent surfaces.

These films allow the interiors of sales outlets and commercial premises such as shops, restaurants, airports, offices, hotels and leisure centres to be customised.

3M offers interior designers a wide range of creative options for decorative glass.

In addition to providing high-quality end results, these films are easy to adapt and apply. They are designed for indoor or outdoor application, and combine functional and decorative elements to maximise your creative options.

Glass, mirrors and showcases can be attractively decorated. The 3M™ Scotchcal™ graphic films for glass can be washed with ordinary detergents.

3M™ Scotchcal™ Graphic Film Series 5525

Calendered translucent films with permanent adhesive, designed for applications of medium duration. 5525C is also available with comply.

Available in two varieties:

- ▶ Haze (etched appearance)
- ▶ Sandblast (sandblast appearance)

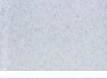

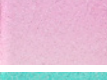

3M™ Scotchcal™ ElectroCut™ Graphic Film Series 7725SE-300

Long-lasting translucent cast films, to create the effect of traditional dusted (acid-etched look) or frosted (sandblasted look) glass. Excellent uniformity of colour under transmitted or reflected light.

The colour range comprises:

- ▶ Dusted and frosted clear
- ▶ Frosted green
- ▶ Frosted blue
- ▶ Frosted pink
- ▶ Frosted gold
